Preface	V
Nomenclature	XV
1 Introduction	1
1.1 Overview of the Injection Molding Process.....	1
1.2 Mold Functions.....	3
1.3 Mold Structures.....	4
1.3.1 External View of Mold.....	4
1.3.2 View of Mold during Part Ejection.....	6
1.3.3 Mold Section and Function.....	7
1.4 Other Common Mold Types.....	9
1.4.1 Three Plate, Multi-Cavity Family Mold.....	9
1.4.2 Hot Runner, Multi-Gated, Single Cavity Mold.....	11
1.4.3 Comparison.....	12
1.5 The Mold Development Process.....	13
1.6 Chapter Review.....	15
2 Plastic Part Design	17
2.1 The Product Development Process.....	17
2.1.1 Product Definition.....	18
2.1.2 Product Design.....	18
2.1.3 Business and Production Development.....	19
2.1.4 Scale-Up and Launch.....	19
2.1.5 Role of Mold Design.....	19
2.2 Design Requirements.....	20
2.2.1 Application Engineering Information.....	20
2.2.2 Production Data.....	21
2.2.3 End Use Requirements.....	22
2.2.4 Product Design Methodology.....	24
2.2.5 Plastic Material Properties.....	26
2.3 Design for Injection Molding.....	28
2.3.1 Uniform Wall Thickness.....	28
2.3.2 Rib Design.....	29
2.3.3 Boss Design.....	29
2.3.4 Corner Design.....	30
2.3.5 Surface Finish and Textures.....	31
2.3.6 Draft.....	33
2.3.7 Undercuts.....	34
2.4 Chapter Review.....	35

3	Mold Cost Estimation	37
3.1	The Mold Quoting Process	37
3.2	Cost Drivers for Molded Parts	39
3.2.1	Effect of Production Quantity	40
3.2.2	Break-Even Analysis	41
3.3	Mold Cost Estimation	43
3.3.1	Cavity Cost Estimation	44
3.3.1.1	Cavity Set Cost	45
3.3.1.2	Cavity Materials Cost	45
3.3.1.3	Cavity Machining Cost	46
3.3.1.4	Cavity Discount Factor	51
3.3.1.5	Cavity Finishing Cost	51
3.3.2	Mold Base Cost Estimation	53
3.3.3	Mold Customization	55
3.4	Part Cost Estimation	60
3.4.1	Mold Cost per Part	60
3.4.2	Material Cost per Part	61
3.4.3	Processing Cost per Part	62
3.4.4	Defect Cost per Part	65
3.5	Chapter Review	66
4	Mold Layout Design	67
4.1	Parting Plane Design	67
4.1.1	Determine Mold Opening Direction	67
4.1.2	Determine Parting Line	70
4.1.3	Parting Plane	71
4.1.4	Shut-Offs	73
4.2	Cavity and Core Insert Creation	74
4.2.1	Height Dimension	74
4.2.2	Length and Width Dimensions	75
4.2.3	Adjustments	76
4.3	Mold Base Selection	77
4.3.1	Cavity Layouts	77
4.3.2	Mold Base Sizing	79
4.3.3	Molding Machine Compatibility	81
4.3.4	Mold Base Suppliers	83
4.4	Mold Material Selection	84
4.4.1	Strength vs. Heat Transfer	84
4.4.2	Hardness vs. Machinability	85
4.4.3	Mold-Maker's Cost vs. Molder's Cost	86
4.4.4	Material Summary	88
4.5	Chapter Review	89

5	Cavity Filling Analysis and Design	91
5.1	Overview	91
5.2	Objectives in Cavity Filling	92
5.2.1	Complete Filling of Mold Cavities	92
5.2.2	Avoid Uneven Filling or Over-Packing	92
5.2.3	Control the Melt Flow	93
5.3	Viscous Flow	94
5.3.1	Shear Stress, Shear Rate, and Viscosity	94
5.3.2	Pressure Drop	95
5.3.3	Rheological Behavior	96
5.3.4	Newtonian Model	98
5.3.5	Power Law Model	99
5.4	Validation	102
5.5	Cavity Filling Analyses and Designs	104
5.5.1	Estimating the Processing Conditions	104
5.5.2	Estimating the Filling Pressure and Minimum Wall Thickness	107
5.5.3	Estimating Clamp Tonnage	109
5.5.4	Predicting Filling Patterns	112
5.5.5	Designing Flow Leaders	114
5.6	Chapter Review	117
 6	 Feed System Design	 119
6.1	Overview	119
6.2	Objectives in Feed System Design	119
6.2.1	Conveying the Polymer Melt from Machine to Cavities	119
6.2.2	Impose Minimal Pressure Drop	120
6.2.3	Consume Minimal Material	121
6.2.4	Control Flow Rates	122
6.3	Feed System Types	123
6.3.1	Two-Plate Mold	123
6.3.2	Three-Plate Mold	125
6.3.3	Hot Runner Molds	130
6.4	Feed System Analysis	132
6.4.1	Determine Type of Feed System	133
6.4.2	Determine Feed System Layout	134
6.4.3	Estimate Pressure Drops	138
6.4.4	Calculate Runner Volume	140
6.4.5	Optimize Runner Diameters	141
6.4.6	Balance Flow Rates	145
6.4.7	Estimate Runner Cooling Times	148
6.4.8	Estimate Residence Time	149
6.5	Practical Issues	150
6.5.1	Runner Cross-Sections	150
6.5.2	Sucker Pins	154

6.5.3	Runner Shut-Offs.....	155
6.5.4	Standard Runner Sizes	157
6.5.5	Steel Safe Designs.....	157
6.6	Chapter Review	158
7	Gating Design	161
7.1	Objectives of Gating Design	161
7.1.1	Connecting the Runner to the Mold Cavity.....	161
7.1.2	Provide Automatic De-Gating.....	161
7.1.3	Provide Aesthetic De-Gating.....	162
7.1.4	Avoid Excessive Shear or Pressure Drop	162
7.1.5	Control Pack Times.....	163
7.2	Common Gate Designs.....	163
7.2.1	Sprue Gate.....	163
7.2.2	Pin-Point Gate	164
7.2.3	Edge Gate.....	165
7.2.4	Tab Gate.....	166
7.2.5	Fan Gate.....	167
7.2.6	Flash/Diaphragm Gate	168
7.2.7	Tunnel/Submarine Gate	169
7.2.8	Thermal Gate	172
7.2.9	Valve Gate	174
7.3	The Gating Design Process.....	175
7.3.1	Determine Type of Gate	175
7.3.2	Calculate Shear Rates	176
7.3.3	Calculate Pressure Drop	178
7.3.4	Calculate Gate Freeze Time	179
7.3.5	Adjust Dimensions	182
7.4	Chapter Review	182
8	Venting	185
8.1	Venting Design Objectives	185
8.1.1	Release Compressed Air	185
8.1.2	Contain Plastic Melt	185
8.1.3	Minimize Maintenance.....	186
8.2	Venting Analysis.....	186
8.2.1	Estimate Air Displacement and Rate	186
8.2.2	Identify Number and Location of Vents	186
8.2.3	Specify Vent Dimensions	189
8.3	Venting Designs	192
8.3.1	Vents on Parting Plane	192
8.3.2	Vents around Ejector Pins	194
8.3.3	Vents in Dead Pockets.....	196
8.4	Chapter Review	197

9	Cooling System Design	199
9.1	Objectives in Cooling System Design	199
9.1.1	Maximize Heat Transfer Rates	199
9.1.2	Maintain Uniform Wall Temperature	199
9.1.3	Minimize Mold Cost	200
9.1.4	Minimize Volume and Complexity	200
9.1.5	Minimize Stress and Corrosion	200
9.1.6	Facilitate Mold Usage	201
9.2	The Cooling System Design Process	201
9.2.1	Calculate the Required Cooling Time	201
9.2.2	Evaluate Required Heat Transfer Rate	206
9.2.3	Assess Coolant Flow Rate	208
9.2.4	Assess Cooling Line Diameter	209
9.2.5	Select Cooling Line Depth	211
9.2.6	Select Cooling Line Pitch	213
9.2.7	Cooling Line Routing	216
9.3	Cooling System Designs	219
9.3.1	Cooling Line Networks	219
9.3.2	Cooling Inserts	222
9.3.3	Conformal Cooling	222
9.3.4	Highly Conductive Inserts	223
9.3.5	Cooling of Slender Cores	224
9.3.5.1	Cooling Insert	225
9.3.5.2	Baffles	226
9.3.5.3	Bubblers	227
9.3.5.4	Heat Pipes	227
9.3.5.5	Conductive Pin	229
9.3.5.6	Interlocking Core with Air Channel	229
9.3.6	One-Sided Heat Flow	230
9.4	Chapter Review	232
10	Shrinkage and Warpage	233
10.1	The Shrinkage Analysis Process	235
10.1.1	Estimate Process Conditions	235
10.1.2	Model Compressibility Behavior	235
10.1.3	Assess Volumetric Shrinkage	237
10.1.4	Evaluate Isotropic Linear Shrinkage	241
10.1.5	Evaluate Anisotropic Shrinkage	242
10.1.6	Assess Shrinkage Range	244
10.1.7	Establishing Final Shrinkage Recommendations	245
10.2	Shrinkage Analysis and Validation	247
10.2.1	Numerical Simulation	247
10.2.2	“Steel Safe” Mold Design	249
10.2.3	Processing Dependence	249

10.2.4	Semi-Crystalline Plastics	251
10.2.5	Effect of Fillers	251
10.3	Warpage	252
10.3.1	Sources of Warpage	252
10.3.2	Warpage Avoidance Strategies	256
10.4	Chapter Review	257
11	Ejection System Design	259
11.1	Objectives in Ejection System Design	261
11.1.1	Allow Mold to Open	261
11.1.2	Transmit Ejection Forces to Moldings	262
11.1.3	Minimize Distortion of Moldings	262
11.1.4	Actuate Quickly and Reliably	262
11.1.5	Minimize Cooling Interference	263
11.1.6	Minimize Impact on Part Surfaces	264
11.1.7	Minimize Complexity and Cost	264
11.2	The Ejector System Design Process	265
11.2.1	Identify Mold Parting Surfaces	265
11.2.2	Estimate Ejection Forces	265
11.2.3	Determine Ejector Push Area and Perimeter	269
11.2.4	Specify Type, Number, and Size of Ejectors	271
11.2.5	Layout Ejectors	273
11.2.6	Detail Ejectors and Related Components	276
11.3	Ejector System Analyses and Designs	278
11.3.1	Ejector Pins	278
11.3.2	Ejector Blades	280
11.3.3	Ejector Sleeves	282
11.3.4	Stripper Plates	283
11.3.5	Elastic Deformation around Undercuts	285
11.3.6	Core Pulls	287
11.3.7	Slides	291
11.3.8	Early Ejector Return Systems	294
11.3.9	Advanced Ejection Systems	296
11.4	Chapter Review	296
12	Structural System Design	299
12.1	Objectives in Structural System Design	300
12.1.1	Minimize Stress	300
12.1.2	Minimize Mold Deflection	304
12.1.3	Minimize Mold Size	305
12.2	Analysis and Design of Plates	306
12.2.1	Plate Compression	306
12.2.2	Plate Bending	309
12.2.3	Support Pillars	312

12.2.4	Shear Stress in Side Walls	317
12.2.5	Interlocks	319
12.2.6	Stress Concentrations	321
12.3	Analysis and Design of Cores	325
12.3.1	Axial Compression	326
12.3.2	Compressive Hoop Stresses	327
12.3.3	Core Deflection	329
12.4	Fasteners	332
12.4.1	Fits	332
12.4.2	Socket Head Cap Screws	336
12.4.3	Dowels	338
12.5	Review	340
13	Mold Technologies	343
13.1	Introduction	343
13.2	Coinjection Molds	343
13.2.1	Coinjection Process	345
13.2.2	Coinjection Mold Design	346
13.2.3	Gas Assist/Water Assist Molding	347
13.3	Insert Molds	350
13.3.1	Low Pressure Compression Molding	350
13.3.2	Insert Mold with Wall Temperature Control	351
13.3.3	Lost Core Molding	353
13.4	Injection Blow Molds	355
13.4.1	Injection Blow Molding	355
13.4.2	Multilayer Injection Blow Molding	357
13.5	Multi-Shot Molds	358
13.5.1	Overmolding	359
13.5.2	Core-Back Molding	360
13.5.3	Multi-Station Mold	362
13.6	Feed Systems	364
13.6.1	Insulated Runner	364
13.6.2	Stack Molds	365
13.6.3	Branched Runners	368
13.6.4	Dynamic Melt Control	369
13.7	Mold Wall Temperature Control	372
13.7.1	Pulsed Cooling	372
13.7.2	Conduction Heating	373
13.7.3	Induction Heating	375
13.7.4	Managed Heat Transfer	377
13.8	In-Mold Labeling	378
13.8.1	Statically Charged Film	379
13.8.2	Indexed Film	380
13.9	Ejection	381

13.9.1	Split Cavity Molds	381
13.9.2	Collapsible Cores	383
13.9.3	Rotating Cores	384
13.9.4	Reverse Ejection	387
13.10	Review	388
Appendix	389
Appendix A:	Plastic Material Properties	390
Appendix B:	Mold Material Properties	394
B.1	Non-Ferrous Metals	394
B.2	Common Mold Steels	395
B.3	Other Mold Steels	396
B.4	Notes	397
Appendix C:	Properties of Coolants	398
Appendix D:	Statistical Labor Data	399
D.1	United States Labor Rates	399
D.2	International Labor Rates	399
D.3	Trends in International Manufacturing Costs	401
Appendix E:	Unit Conversions	402
E.1	Length Conversions	403
E.2	Mass/Force Conversions	403
E.3	Pressure Conversions	403
E.4	Flow Rate Conversions	404
E.5	Viscosity Conversions	404
E.6	Energy Conversions	404
Appendix F:	Advanced Derivations	405
Bibliography	409
Subject Index	413
